# WELCOME...

## ...TO OUR SOUTHERN DESIGN BROCHURE

Our mission is to provide good quality affordable homes for clients in the lower South Island.

Southernwide Building has been operating under the directorship of John Taylor since 2008. We are locally owned and operated and are passionate about the Southern Region and providing excellent service.

We have a fantastic team who will manage your building process from concept to completion.

Southernwide Building can tailor any plan to suit your needs and lifestyle. Be it a new home design and build, a renovation or a shed you will receive the same quality service throughout.

Following is a sample range of plans that we can offer from residential builds, small farm worker's accommodation or holiday homes to larger lifestyle builds.

Our in-house design team can assist with any variations to these plans or send us the details of your property and we can send you back a selection of designs that will suit, check out our website for more plans and inspiration [www.southernwidebuilding.co.nz](http://www.southernwidebuilding.co.nz)

Call us today or visit our friendly team to start making your dreams become reality.

## The Proven, H1-Compliant Concrete Foundation

When it comes to H1 requirements, Allied Concrete has been leading the way since the changes came into effect. We understand the challenges, expectations, and performance standards that come with H1 compliance and we've been delivering reliable solutions ever since.

Allied Concrete's SuperSlab+ is a game-changing solution that delivers edge-insulated concrete foundations designed to make new homes and buildings warmer, drier, and healthier.

### Why Choose SuperSlab+?

#### H1 Compliant

SuperSlab+ surpasses the latest R-value requirements of the H1 building code, offering unmatched thermal performance and reduced energy consumption.

#### Certified Solution

SuperSlab+ is a CodeMark certified and BRANZ appraised solution. With these certifications, you can be confident in the quality and compliance of your project.

#### Sustainable & Low Carbon

SuperSlab+ takes its environmental commitment to the next level when combined with our eco-conscious technologies like Ecrete™ and QPOD.

## Building towards a sustainable future

As we move towards a brighter and more sustainable Aotearoa New Zealand, it's important that we consider all aspects of our building practices. Every day, Allied Concrete is taking steps to reduce our carbon footprint and create a better future for generations to come. That's why we're proud to introduce Ecrete™ - an innovative concrete mix designed to reduce carbon impact without compromising on strength and durability. With its cutting-edge formula and environmentally friendly properties, Ecrete™ is paving the way for sustainable building practices in New Zealand.

When you choose Allied Concrete, you're already taking a step towards sustainable building practices by reducing

embodied carbon by up to 20%\* compared to the 2020 ISC baseline. But with our revolutionary Ecrete™ range, we're able to take it even further - reducing CO<sub>2</sub> emissions by 20-75%. This innovative solution is designed to not only meet your project's needs but also make a positive impact on the environment. With Ecrete™, you can feel good about the concrete you use, knowing that you're making a difference in building a more sustainable future.

Ecrete™ reduces CO<sub>2</sub> by 10-50%. Ecrete™ Plus is a bespoke carbon-reduced mix that our technical team can develop based on our client's specific requirements. Ecrete™ Plus can reduce CO<sub>2</sub> beyond 50% and is designed to balance our client's strength, flowability and finishing requirements.

## Low Carbon Concrete

Ecrete™ is our innovative concrete mix, engineered to reduce carbon impact without compromising on strength and durability. Every project specifying Ecrete™ now benefits from a third-party verified Environmental Product Declaration (EPD), ensuring accurate CO<sub>2</sub> reduction numbers tailored to your project's specific needs. This marks a significant step forward in our commitment to transparency and environmental responsibility.

CO <sub>2</sub> REDUCTION	Allied mixes	ecrete™			ecreteplus		
	e10	e20	e30	e40	e50	e60	e70
0%	10%	20%	30%	40%	50%	60%	70%

0% - 20%\* reduction in CO<sub>2</sub>

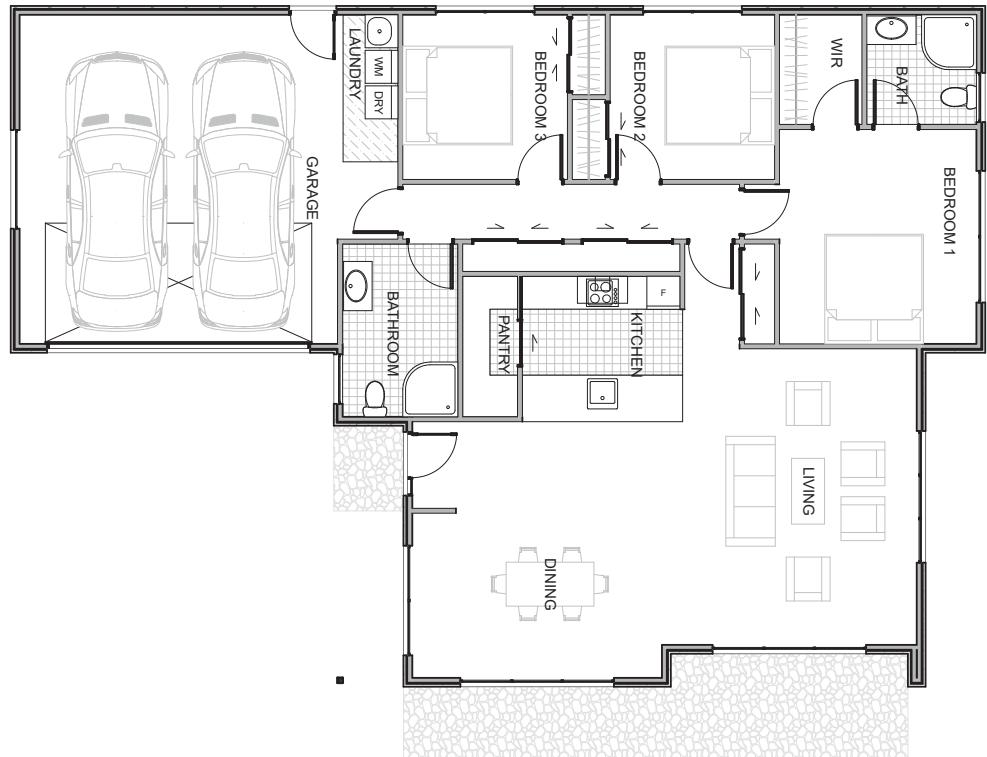

20% - 50% reduction in CO<sub>2</sub>

50% - 80% reduction in CO<sub>2</sub>

*Reduction in Embodied Carbon compared to 2020 Infrastructure Sustainability Council (ISC) 2020 baseline for ready mixed concrete.*

*\*CO<sub>2</sub> reduction for Allied mixes will alter dependent on branch location*

# Beautiful, lightweight, highly durable exterior cladding

## Lightweight Concrete Cladding

The EzPanel system is a cavity-based autoclaved aerated concrete (AAC) panel system which when finished with a layer of fibreglass reinforced polymer modified plaster creates a lightweight, highly durable exterior cladding.

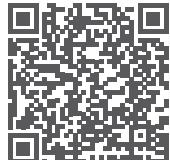

### Features

- EZpanel (AAC) are reinforced with a high strength wire mesh.
- Exterior insulation where temperature fluctuates the most.
- Very good resistance to the transmission of airborne sound.
- State of the art penetration flashing system.
- Fire tested.
- Large range of texture finishes and any colour you desire.
- Branz tested & appraised.
- Installed by LBP Qualified and Certified Exterior Plasterers.
